

Mesa County GIS Viewer Quick-Start Guide

Map themes are simply collections of related data layers. Once you have selected a theme you can click on the map to retrieve the theme's data.

Search by any of eight methods to find the data you are looking for.

If a map theme has configurable layers, a layer list will appear on the map. Clicking the check box next to the layer will turn that layer on. Clicking the box again will turn the layer off.

☐ Subdivision Plats

☐ Deposit Surveys

☐ Historic Surveys

☐ GLO Plats

☐ Deeded ROW

☐ Dedicated ROW/Platted ROW

☐ Permanent Easement ROW

☐ Vacated ROW

☐ Road Book/Petitioned ROW

☐ Road Proc 1890/1892

☐ GPS SIMS(Delta County)

☐ Survey Monuments

☐ Survey Calibration

☐ Vertical Datum Differences

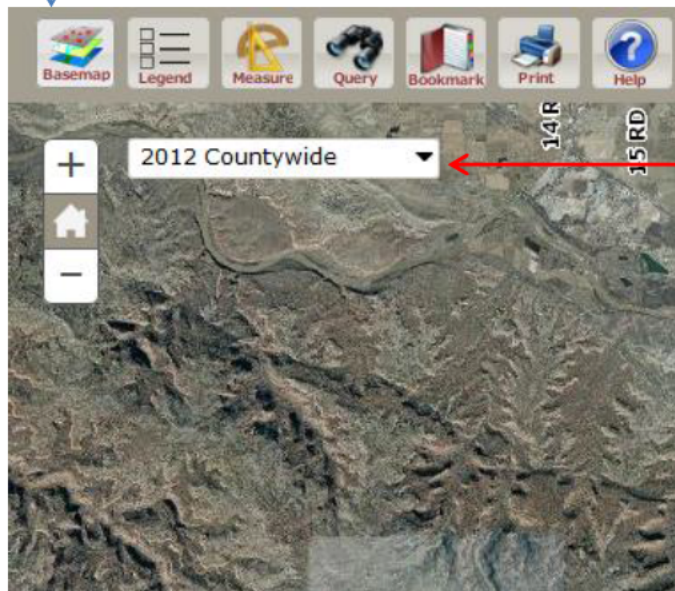

Zoom

Imagery/Base map

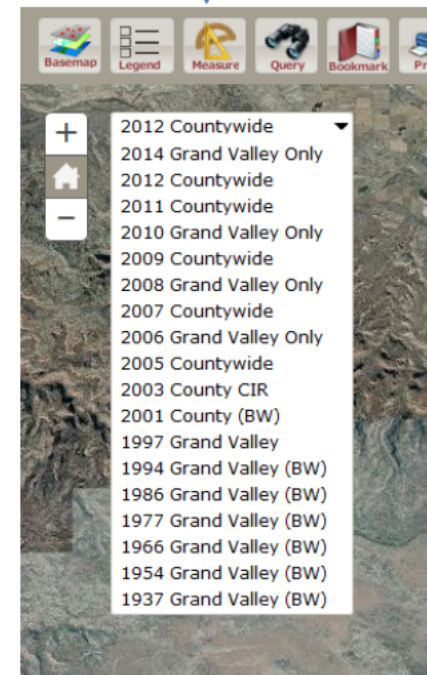

Clicking on the Imagery button switches from the default base map

The Imagery button is now changed to the default base map button. Clicking this button will turn off the imagery and return you to the default base map.

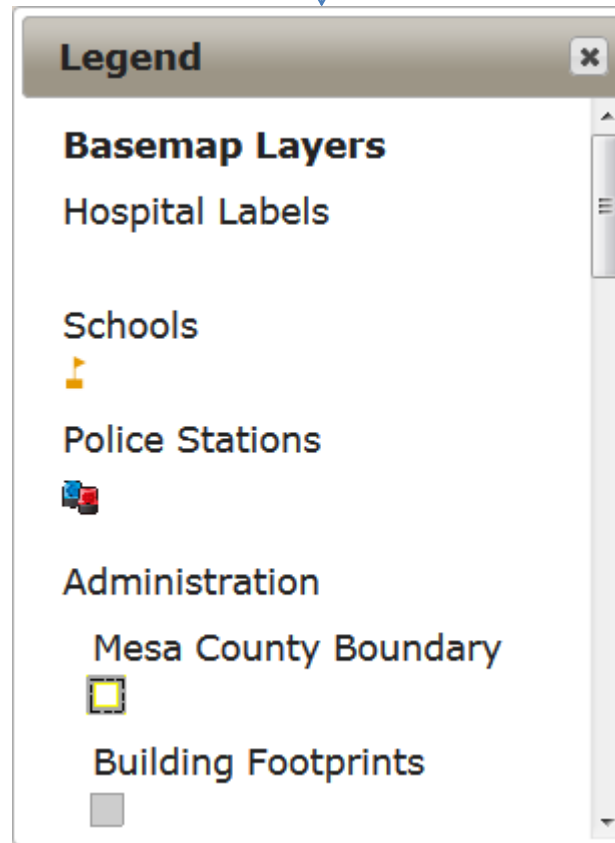

Clicking the base map dropdown menu reveals the imagery years you can choose.

Legend

Clicking on the legend button opens the legend

The legend shows the names and symbols for the layers that are currently turned on for the map.

Draw/Measure

Clicking on the draw/measure button opens the draw/measure tool

Draw/Measure [X]

Select a Draw Tool:

[Polygon] [Line] [Point] [Rectangle] [Freehand] [Polyline] [Circle] [Arc] [Text]

☒ Enable Measurement?

Unit of Measure: Acres [v]

Press **CTRL** to enable snapping.

Measurement Results

Area:

Perimeter:

[Clear All] [Close]

Select a shape to draw on-screen or select the A to annotate your map

If the Enable Measurement box is checked you will see the area, perimeter or length associated with the shape you draw

Measurement results will be displayed here and on the map

Holding down the Ctrl key (Cmd on Mac) while you draw will allow your vertices to snap to map theme features

Closing the draw tool will not clear the graphics and measurements on the map

The Clear All button clears graphics and annotation from the map

Attribute Query

Clicking on the query button opens the attribute query tool.

Switch to graphic query

The "Attribute Query" dialog box has a title bar with "Attribute Query" and "Location Query" tabs, and a close button. It contains a "Layer:" dropdown menu, a checkbox for "Select From Within the Map Extent", a "Fields:" section with a placeholder message, a grid of operator buttons, a "Get Examples" button, a "Where:" text input field, and "Submit Query", "Clear", and "Help" buttons at the bottom.

Enter a buffer distance and a unit of measure

Choose a field to build your SQL statement

Click an operator button or type your own in the where box

Build your SQL "where" statement

Toggle one or both filters on and off by clicking "Add buffer to query" and "Filter by attributes"

Query Results

The screenshot shows a 'Query Results' dialog box with a title bar containing a close button (X). The main content area is titled 'Trails' and features a 'Display By:' dropdown menu currently set to 'ROUTE_NAME'. Below this is a scrollable list of trail names, each preceded by a right-pointing triangle icon. At the bottom of the dialog are three buttons: 'Back to query' (with a left arrow icon), 'CSV', and 'Close'. Annotations with leader lines point to various parts of the interface:

- Change how results are displayed**: Points to the 'Display By:' dropdown menu.
- Click on any result heading to zoom to the feature and display feature attributes**: Points to the first result heading, 'Flume Canyon'.
- Return to the query dialog**: Points to the 'Back to query' button.
- Download your results to a CSV file**: Points to the 'CSV' button.
- Close the window**: Points to the close button (X) in the title bar.
- Close the query tool**: Points to the 'Close' button.

Trails
Display By: ROUTE_NAME

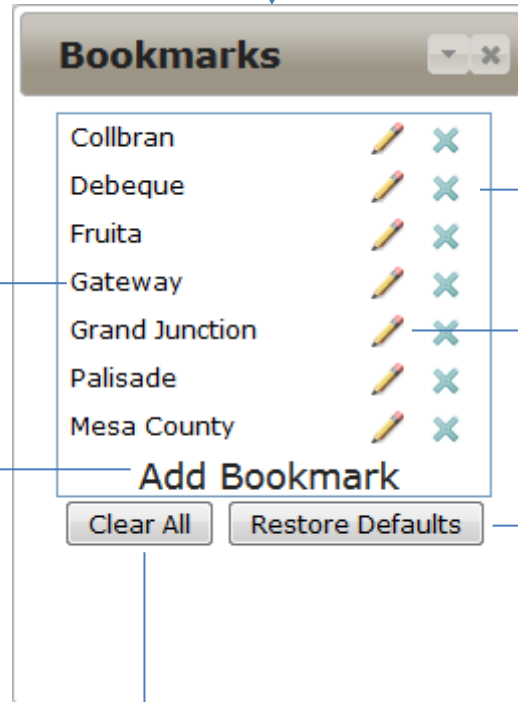

- ▶ Flume Canyon
- ▶ Devils Canyon
- ▶ Ute Canyon
- ▶ Echo Canyon
- ▶ Billings Canyon Access Rd
- ▶ DEVILS CANYON 7469.0
- ▶ BOX CANYON SPUR E 7893.1E
- ▶ Billings Canyon Access Rd

Back to query CSV Close

Bookmarks

Click on the bookmark icon to display the bookmark widget

Close or minimize the window

Click the X to delete the bookmark

Click the pencil icon to edit the bookmark name

Click on any bookmark name to zoom to that map extent

Click Add Bookmark to create a custom bookmark at any extent

The Restore Defaults button will delete all custom bookmarks and restore the default bookmarks in the widget

The Clear All button will delete all custom bookmarks permanently and all default bookmarks during the current map session

Export for Printing

Click on the printer icon to display the print tool

Export For Printing [X]

Print Size and Format:

11 x 17 Landscape PDF

☐ Include Theme Legend

Title: Mesa County Map

Export Close

Chose a print size and orientation

Check this box if you want the legend printed with the map

Close the window

Choose the format you want to export to

Type in this box to change the default title

Close the print dialog

Click the print button to begin the export

Note: This tool exports the map to your chosen format and opens it in a new window. Use your browser's native printing capabilities to send the map to your local printer

Context menu (Right-Click)

Right clicking on the map will display a context menu. There are three tools on this menu that all correspond to the point you right-clicked on the map.

Opens a new window and shows Google Street View

Copy the location's UTM coordinates to your clipboard

Copy the location's geographic (latitude/longitude) coordinates to your clipboard
