

Mesa County GIS Mobile Viewer Quick-Start Guide

Tap the menu icon to toggle
the tools menu side panel

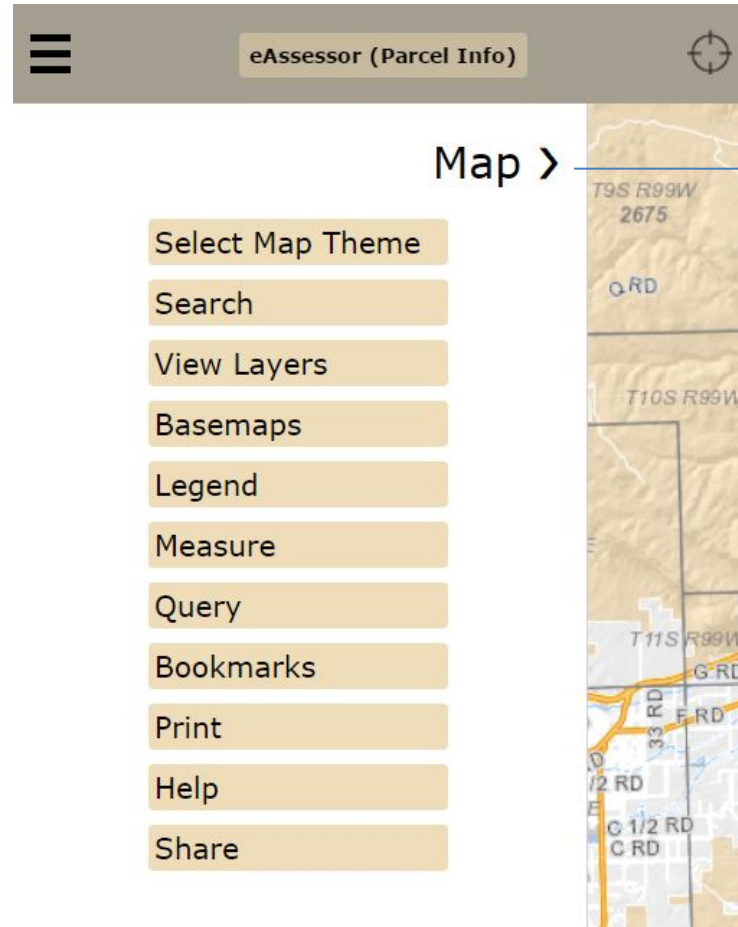

Toggle your current location on the
map by tapping the geolocation icon

Tap the current map theme title to display the layers
that make it up. You can then turn layers on and off

Tools Menu

Tapping any menu item opens its corresponding tool or dialog. These tools are detailed in the following pages

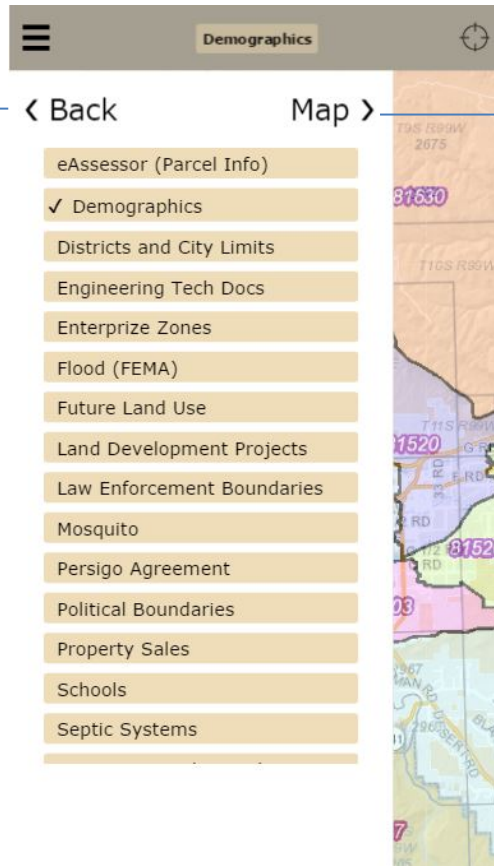

Map >

Tapping Map closes the side panel and returns to the map

Select Map Theme

Tapping Back brings you back to the main menu

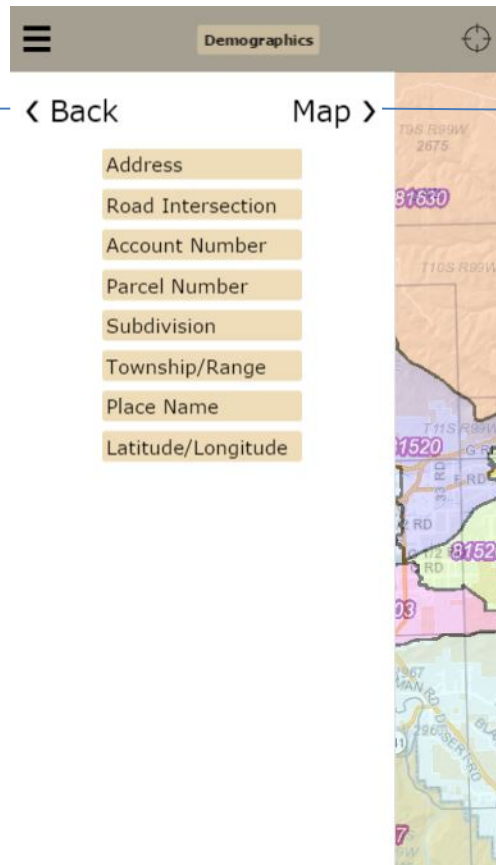

Tapping Map closes the side panel and returns to the map

Tap any theme title in the list to overlay that Theme and its respective layers on the map

Search

Tapping Back brings you back to the main menu

Tapping Map closes the side panel and returns to the map

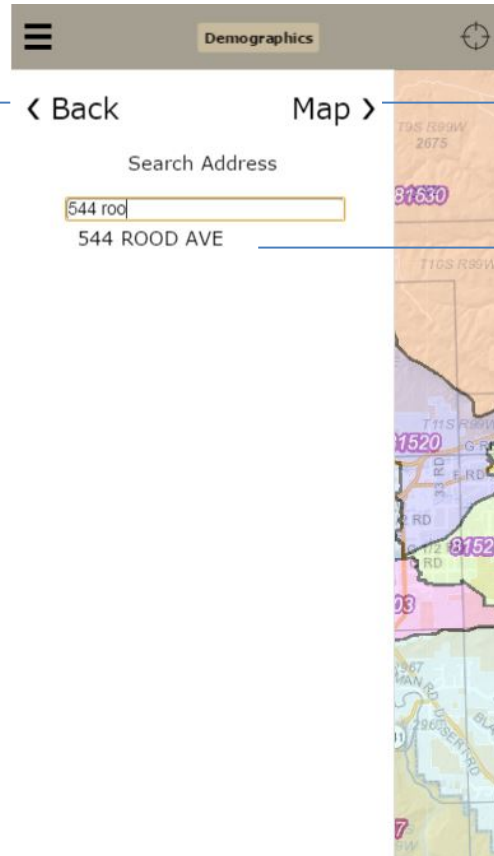

Tap any of the 8 search functions in the search menu to open the search dialog

Continued

Search

Tapping Back brings you back to the search menu

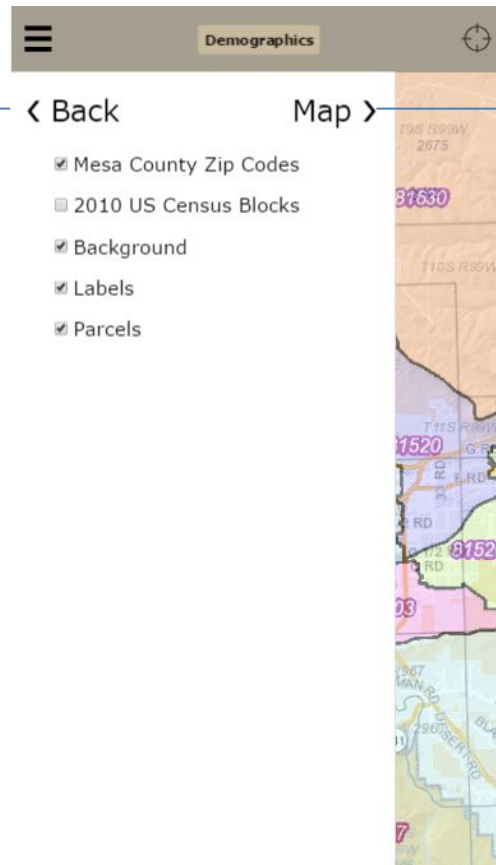

Tapping Map closes the side panel and returns to the map

Type in an address and select one of the autocompleted choices. The map will then zoom to that address

View Layers

Tapping Back brings you back to the main menu

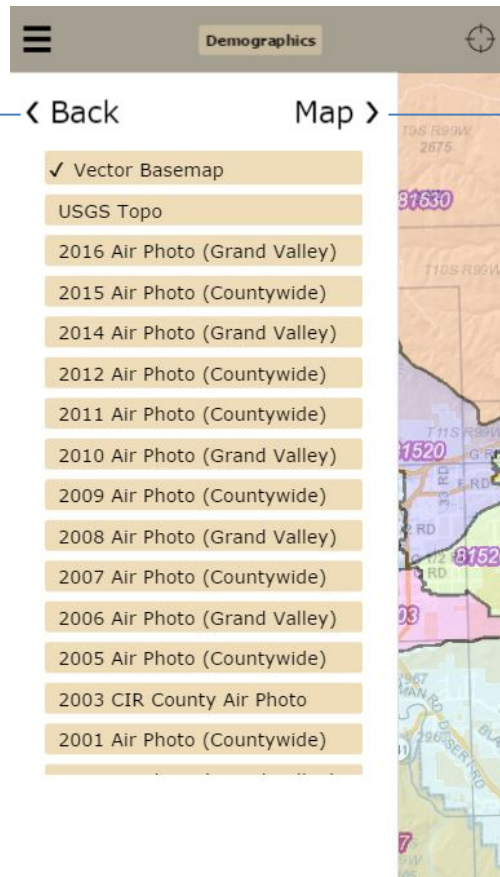

Tapping Map closes the side panel and returns to the map

Clicking the check box next to a layer will turn that layer on. Clicking the box again will turn the layer off.

Base Maps

Tapping Back brings you back to the main menu

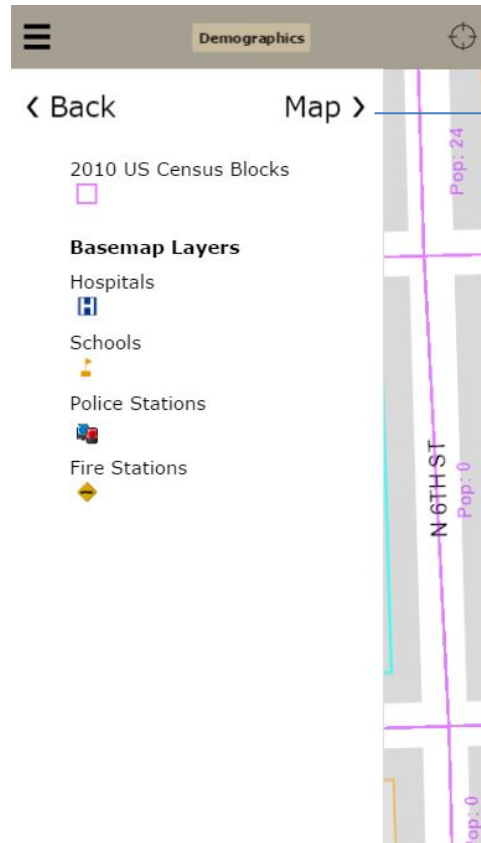

Tapping Map closes the side panel and returns to the map

Toggle between base maps and imagery

Legend

Tapping Back brings you back to the main menu

Map >

Tapping Map closes the side panel and returns to the map

The legend shows the names and symbols for the layers that are currently turned on for the map.

Draw/Measure

The screenshot shows the 'Demographics' app interface. At the top, there's a header with a menu icon, the title 'Demographics', and a location icon. Below the header, there are two buttons: '< Back' and 'Map >'. The main section is titled 'Measure/Draw'. It contains a checkbox 'Enable Measurement?' which is checked. Below this is a 'Select a Draw Tool:' section with seven icons: a rectangle, a circle, a line, a polygon, a freehand line, a star, and a circle with a cross. A 'Unit of Measure' dropdown is set to 'Acres'. Below that is a 'Measurement Results' section with labels for 'Area:' and 'Perimeter:'. At the bottom is a 'Clear All' button. On the right, a map is visible with a purple rectangle drawn on it. The map has labels for 'N 6TH ST' and 'Pop: 24'.

Tapping Back brings you back to the main menu

If the Enable Measurement box is checked you will see the area, perimeter or length associated with the shape you draw

Measurement results will be displayed here and on the map

The Clear All button clears graphics and annotation from the map

Tapping Map closes the side panel and returns to the map

Select a shape to draw on-screen

Holding down the Ctrl key (Cmd on Mac) while you draw will allow your vertices to snap to map theme features

Attribute Query

The image shows a mobile application interface for querying demographic data. The interface includes a top header with a menu icon, a title bar, and a map view. The main content area contains a query builder with tabs for 'Attribute Query' and 'Location Query'. The 'Attribute Query' tab is active, showing a 'Layer' dropdown, a checkbox for 'Select From Within the Map Extent', a 'Fields' input, a set of operator buttons, a 'Where' input, and buttons for 'Submit Query', 'Help', and 'Clear'. A map on the right shows a street view with demographic data overlays.

Switch to location/graphic query

Tapping Back brings you back to the main menu

Map >

Tapping Map closes the side panel and returns to the map

Choose a layer to query

Choose this box to only query within the current map extent

Choose the field to be used for the query

Use the operator buttons to help quickly build a SQL statement

Your SQL "where" statement goes in this box

Clear the query

After building your query, Tap the submit query button
